

Hands-on Lab: COUNT, DISTINCT, LIMIT

Skills
Network

Estimated time needed: 30 minutes

In this lab, you will learn a few useful expressions that are used with SELECT statements. First, you will learn COUNT, which is an aggregate function that retrieves the number of rows that matches the query criteria. Next, you will learn DISTINCT, which is used to remove duplicate values from a specified result set and only return the unique values. Lastly, you will learn LIMIT, which is used for restricting the number of rows retrieved from the table.

Software used in this lab

In this lab, you will use [Datasette](#), an open-source multi-tool for exploring and publishing data.

Database used in this lab

The database used in this lab comes from the following data set source: [Film Locations in San Francisco](#) under a [PDDL: Public Domain Dedication and License](#).

Objectives

After completing this lab, you will be able to:

- Retrieve the number of rows that match a query criteria
- Remove duplicate values from a result set and return the unique values
- Restrict the number of rows retrieved from a table

Exploring the Database

Let us first explore the **SanFranciscoFilmLocations** database using the **Datasette** tool:

1. If the first statement listed below is not already in the Datasette textbox on the right, then copy the code below by clicking the little copy button on the bottom right of the code block and then paste it into the textbox of the Datasette tool using either **Ctrl+V** or right-click in the text box and choose **Paste**.

```
SELECT * FROM FilmLocations;
```

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT * FROM FilmLocations;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

2. Click Submit Query.
3. Now, you can scroll down the table and explore all the columns and rows of the **FilmLocations** table to get an overall idea of the table.

| Title | ReleaseYear | Locations | FunFacts | ProductionCompany | Distributor | Director | Writer | Actor1 | Actor2 | Actor3 |
|-------|-------------|---------------------------------------|----------|-------------------|-------------|----------|--|----------|--------------|-------------|
| 180 | 2011 | Epic Roasthouse (399 Embarcadero) | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Mason & California Streets (Nob Hill) | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Justin Herman Plaza | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | 200 block Market Street | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | City Hall | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Polk & Larkin Streets | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Randall Museum | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriram, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | 555 Market St. | | SPI Cinemas | | Jayendra | Umarji | Siddarth | Nithya | Priya |

4. These are the column attribute descriptions from the **FilmLocations** table:

| | |
|--------------------|---|
| FilmLocations(| |
| Title: | titles of the films, |
| ReleaseYear: | time of public release of the films, |
| Locations: | locations of San Francisco where the films were shot, |
| FunFacts: | funny facts about the filming locations, |
| ProductionCompany: | companies who produced the films, |
| Distributor: | companies who distributed the films, |
| Director: | people who directed the films, |
| Writer: | people who wrote the films, |
| Actor1: | person 1 who acted in the films, |
| Actor2: | person 2 who acted in the films, |
| Actor3: | person 3 who acted in the films |
|) | |

Using COUNT statement

Let us go through some examples of COUNT-related queries.

1. Suppose we want to count the number of records or rows of the "FilmLocations" table. The query for this would be:

```
SELECT COUNT(*) FROM FilmLocations;
```

Copy the code above and paste it to the query box of the Datasette tool. Then click **Submit query**. Your output result set should look like the image below:

The screenshot shows the Datasette tool interface. At the top, there is a breadcrumb navigation: "home / Practice SQL / SanFranciscoFilmLocations". Below this is a header "Practice SQL" and a sub-header "Database: SanFranciscoFilmLocations". A text input box contains the SQL query: "1 SELECT COUNT(*) FROM FilmLocations;". Below the input box is a tip: "Tip: Autocomplete with Ctrl+Enter or Cmd+Enter". A "Submit query" button is visible. Below the input box, a "Results" section shows a green message: "All commands ran successfully". Below this, the query "SELECT COUNT(*) FROM FilmLocations" is displayed. The result set shows a single column "COUNT(*)" with a single row containing the value "3414". At the bottom, there is a footer: "Powered by Datasette".

2. We want to count the number of locations of the films. But we also want to restrict the output result set so that we only retrieve the number of locations of the films written by a certain writer. The query for this can be written as:

```
SELECT COUNT(Locations) FROM FilmLocations WHERE Writer="James Cameron";
```

Copy the code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT COUNT(Locations) FROM FilmLocations WHERE Writer="James Cameron";
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

Support

```
SELECT COUNT(Locations) FROM FilmLocations WHERE Writer="James Cameron"
```

| COUNT(Locations) |
|------------------|
| 48 |

Powered by [Datasette](#)

Using DISTINCT statement

In this exercise, you will go through some examples of using DISTINCT in queries.

1. Assume that we want to retrieve the titles of all films in the table so that duplicates will be discarded in the output result set.

```
SELECT DISTINCT Title FROM FilmLocations;
```

Copy the code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

Your output resultset should look like the image below:

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT DISTINCT Title FROM FilmLocations;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT DISTINCT Title FROM FilmLocations

| Title |
|-------------------------------|
| 180 |
| 24 Hours on Craigslist |
| A Night Full of Rain |
| About a Boy |
| Age of Adaline |
| After the Thin Man |
| Ant-Man |
| Americana |
| Another 48 Hours |
| Around the Fire |
| Attack of the Killer Tomatoes |

Support

2. We want to retrieve the count of release years of the films produced by a specific company so that duplicate release years of those films will be discarded in the count.

SELECT COUNT(DISTINCT ReleaseYear) FROM FilmLocations WHERE ProductionCompany="Warner Bros. Pictures";

Copy the code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

Your output resultset should look like the image below:

home / Practice SQL / SanFranciscoFilmLocations

Practice SQL

Database: SanFranciscoFilmLocations

1 SELECT COUNT(DISTINCT ReleaseYear) FROM FilmLocations WHERE ProductionCompany="Warner Bros. Pictures";

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT COUNT(DISTINCT ReleaseYear) FROM FilmLocations WHERE ProductionCompany="Warner Bros. Pictures"

COUNT(DISTINCT ReleaseYear)

14

Powered by Datasette

Support

Using LIMIT statement

In this exercise, you will first go through some examples of using LIMIT in queries.

1. Retrieve only the first 25 rows from the table so that rows other than those are not in the output result set.

```
SELECT * FROM FilmLocations LIMIT 25;
```

Copy the code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

Your output resultset should look like the image below:

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT * FROM FilmLocations LIMIT 25;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

Support

```
SELECT * FROM FilmLocations LIMIT 25
```

| Title | ReleaseYear | Locations | FunFacts | ProductionCompany | Distributor | Director | Writer | Actor1 | Actor2 | Actor3 |
|-------|-------------|---------------------------------------|----------|-------------------|-------------|----------|---|----------|--------------|-------------|
| 180 | 2011 | Epic Roasthouse (399 Embarcadero) | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriam, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Mason & California Streets (Nob Hill) | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriam, & Suba | Siddarth | Nithya Menon | Priya Anand |
| 180 | 2011 | Justin Herman Plaza | | SPI Cinemas | | Jayendra | Umarji Anuradha, Jayendra, Aarthi Sriam, & Suba | Siddarth | Nithya Menon | Priya Anand |

2. Now, we want to retrieve 15 rows from the table starting from row 11.

```
SELECT * FROM FilmLocations LIMIT 15 OFFSET 10;
```

Copy the code above and paste it to the textbox of the Datasette tool. Then click **Submit query**.

Your output resultset should look like the image below:

Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT * FROM FilmLocations LIMIT 15 OFFSET 10;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

Results

All commands ran successfully

SELECT * FROM FilmLocations LIMIT 15 OFFSET 10

| Title | ReleaseYear | Locations | FunFacts | ProductionCompany | Distributor | Director | Writer | Actor1 | Actor2 | Actor3 |
|----------------------|-------------|---|---|-------------------|-----------------------|-----------------|-----------------|----------------|------------------|--------|
| A Night Full of Rain | 1978 | Fairmont Hotel (950 Mason Street, Nob Hill) | In 1945 the Fairmont hosted the United Nations Conference on International Organization as delegates arrived to draft a charter for the organization. The U.S. Secretary of | Liberty Film | Warner Bros. Pictures | Lina Wertmuller | Lina Wertmuller | Candice Bergen | Glencarlo Gianni | |

Practice exercises

LIMIT

1. Retrieve the names of the first 50 films.

► Hint

▼ Query Solution

```
``` SELECT DISTINCT Title FROM FilmLocations LIMIT 50; ```
```

## ▼ Output

# Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT DISTINCT Title FROM FilmLocations LIMIT 50;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

## Results

All commands ran successfully

SELECT DISTINCT Title FROM FilmLocations LIMIT 50

| Title                         |
|-------------------------------|
| 180                           |
| 24 Hours on Craigslist        |
| A Night Full of Rain          |
| About a Boy                   |
| Age of Adaline                |
| After the Thin Man            |
| Ant-Man                       |
| Americana                     |
| Another 48 Hours              |
| Around the Fire               |
| Attack of the Killer Tomatoes |

2. Retrieve the first 10 film names released in 2015.

- Hint
- Query Solution
- ▼ Output

# Practice SQL

Database: SanFranciscoFilmLocations

```
1 SELECT DISTINCT Title FROM FilmLocations WHERE ReleaseYear=2015 LIMIT 10;
```

Tip: Autocomplete with Ctrl+Enter or Cmd+Enter

Submit query

## Results

All commands ran successfully

SELECT DISTINCT Title FROM FilmLocations WHERE ReleaseYear=2015 LIMIT 10

| Title          |
|----------------|
| Age of Adaline |
| Ant-Man        |
| Americana      |
| Summertime     |
| Cardinal X     |
| I Am Michael   |
| Steve Jobs     |
| Quitters       |
| San Andreas    |
| Sense8         |

3. Retrieve the next 3 film names that follow after the first 5 films released in 2015.

- Hint
- ▼ Query Solution

```
SELECT DISTINCT Title FROM FilmLocations WHERE ReleaseYear=2015 LIMIT 3 OFFSET 5;
```

## ▼ Output

home / Practice SQL / SanFranciscoFilmLocations

# Practice SQL

# Conclusion

Congratulations! You have completed this lab.

You are now able to:

- Use COUNT statements to determine the number of entries in a database based on filtering conditions.
- Use DISTINCT statements to determine the unique entries in a database based on filtering conditions.
- Use LIMIT statements to restrict the response to a desired set of rows based on filtering conditions.
- Use a combination of these statements to execute more complex queries on the database.
